Dillinger

Dillinger is a cloud-enabled, mobile-ready, offline-storage, AngularJS powered HTML5 Markdown editor.

  - Type some Markdown on the left
  - See HTML in the right
  - Magic

Markdown is a lightweight markup language based on the formatting conventions that people naturally use in email. As [John Gruber] writes on the [**Markdown site**] [**1**]:

> The overriding design goal for Markdown's
> formatting syntax is to make it as readable
> as possible. The idea is that a
> Markdown-formatted document should be
> publishable as-is, as plain text, without
> looking like it's been marked up with tags
> or formatting instructions.

This text you see here is *actually* written in Markdown! To get a feel for Markdown's syntax, type some text into the left window and watch the results in the right.

Version
3.0.0

Tech

Dillinger uses a number of open source projects to work properly:

* [AngularJS] - HTML enhanced for web apps!
* [Ace Editor] - awesome web-based text editor
* [Marked] - a super fast port of Markdown to JavaScript
* [Twitter Bootstrap] - great UI boilerplate for modern web apps
* [node.js] - evented I/O for the backend
* [Express] - fast node.js network app framework [@tjholowaychuk]
* [Gulp] - the streaming build system
* [keymaster.js] - awesome keyboard handler lib by [@thomasfuchs]
* [jQuery] - duh

Installation

```sh
$ git clone [git-repo-url] dillinger
$ cd dillinger
$ npm i -d
$ mkdir -p public/files/{md,html,pdf}
$ gulp build --prod
$ NODE_ENV=production node app
```

Plugins

Dillinger is currently extended with the following plugins

* Dropbox
* Github
* Google Drive
* OneDrive

Readmes, how to use them in your own application can be found here:

* plugins/dropbox/README.md
* plugins/github/README.md
* plugins/googledrive/README.md
* plugins/onedrive/README.md

Development

Want to contribute? Great!

Dillinger uses Gulp + Webpack for fast developing.
Make a change in your file and instantanously see your updates!

Open your favorite Terminal and run these commands.

First Tab:
```sh
$ node app
```

Second Tab:
```sh
$ gulp watch
```

(optional) Third:
```sh
$ karma start
```
